## FURNITURE made of LAVA

---

The [BLACK] series designed by award winning Raimonds Cirulis combines new materials, aesthetics and functionality to create beautiful pieces of furniture - made from lava.

The lava is also known as volcanic basalt. It is located in the crust of the Earth.

The stones are collected from quarries, crushed and heated up to become liquid. Afterwards the mass can be tamed and shaped by hand.

Please enjoy this special and fascinating world of lava furniture.

## NATURE shaped by hand

Millions of years ago, eruptions from the center of the Earth expelled an enormous quantity of lava - volcanic basalt - to the planet surface.
