# Chairs

# Alura

The Alura Chair combines contemporary design with everyday practicality. Built from durable powder-coated aluminium, it offers exceptional stability while remaining lightweight and easy to handle. The chair's clean lines and refined proportions make it a natural fit for both residential and professional settings.

Stackable for convenient storage and easy to maintain, the Alura Chair is designed for effortless outdoor living. Optional teak armrests add a touch of warmth, bringing subtle contrast to its sleek, modern frame.

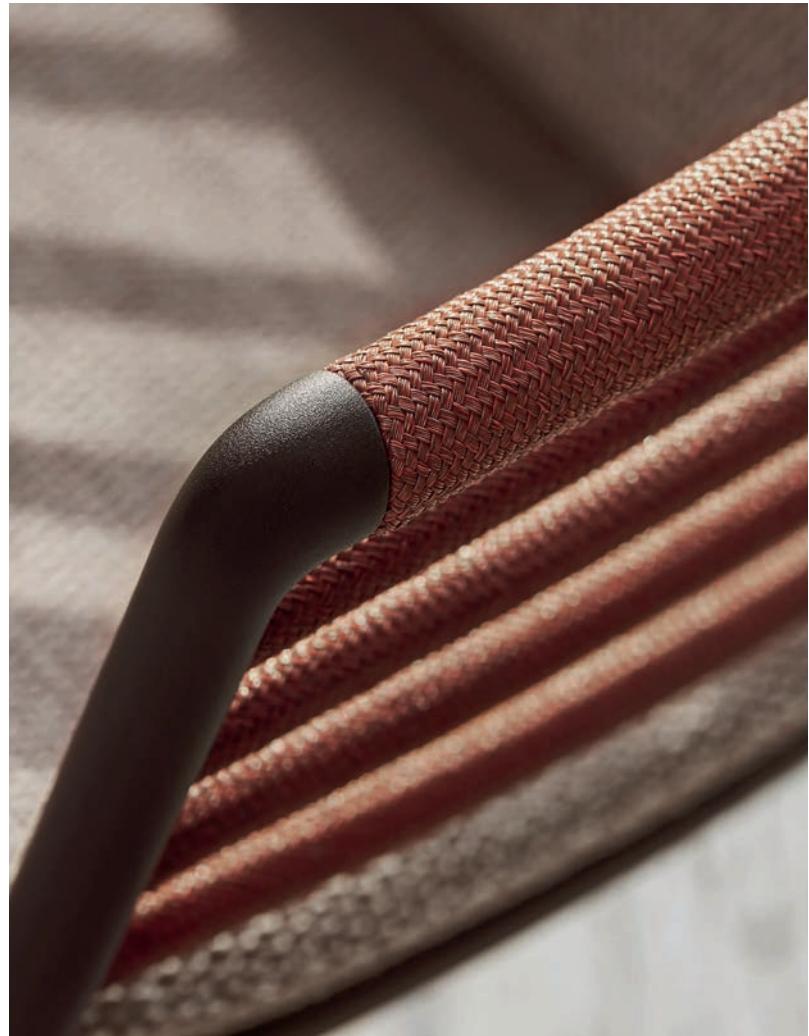

# Archy

The Archy Collection is defined by its sculptural sleeves that wrap gracefully around the tubular backrest. Each piece reflects meticulous craftsmanship and a sense of balance between structure and softness.

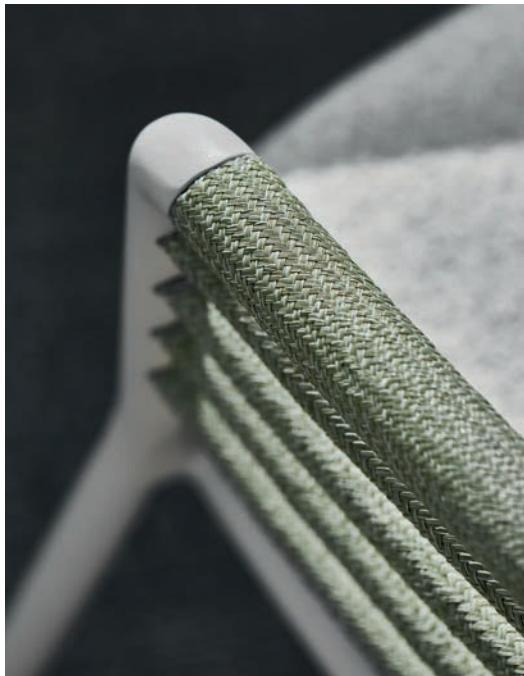

This year, the collection expands with a teak edition that translates the signature Archy design into solid wood, bringing a subtle warmth and a new material expression to the range. The aluminium version, with its Batyline seat, continues to embody lightness and precision. Both can be paired with cushions in a wide range of fabrics, adding comfort and depth to the design.

Expanding beyond the lounge and dining formats, the aluminium Archy also introduces a low dining chair, designed to pair effortlessly with lower tables for relaxed, informal gatherings.

Defined by clarity of form and enduring comfort, the Archy Collection embodies the timeless ease that characterises Royal Botania.

The Archy teak frame draws inspiration from the Vita collection, evolving into a softer, rounder design that captures the essence of modern outdoor comfort. Its refined curves bring a sense of warmth and ease, blending elegance with a contemporary aesthetic.

Rounded legs echo the smooth lines of the seating, creating a harmonious flow throughout. With modular seating and tables offered in six fiber colors and various tabletop materials, Archy makes it easy to personalize any outdoor space.

# Calypso

The Calypso Collection features a selection of outdoor seating options; each piece showcases a durable teak base paired with a stainless-steel backrest with padded upholstery.

These zip-on covers are designed for easy maintenance, simplifying cleaning and storage.

Available in a wide range of textiles, the collection offers extensive colour customization options to reflect any mood or style. Additionally, the collection features a “Kris Kross” weaving pattern, crafted from synthetic outdoor fibre, providing a choice between woven and textile backrests.

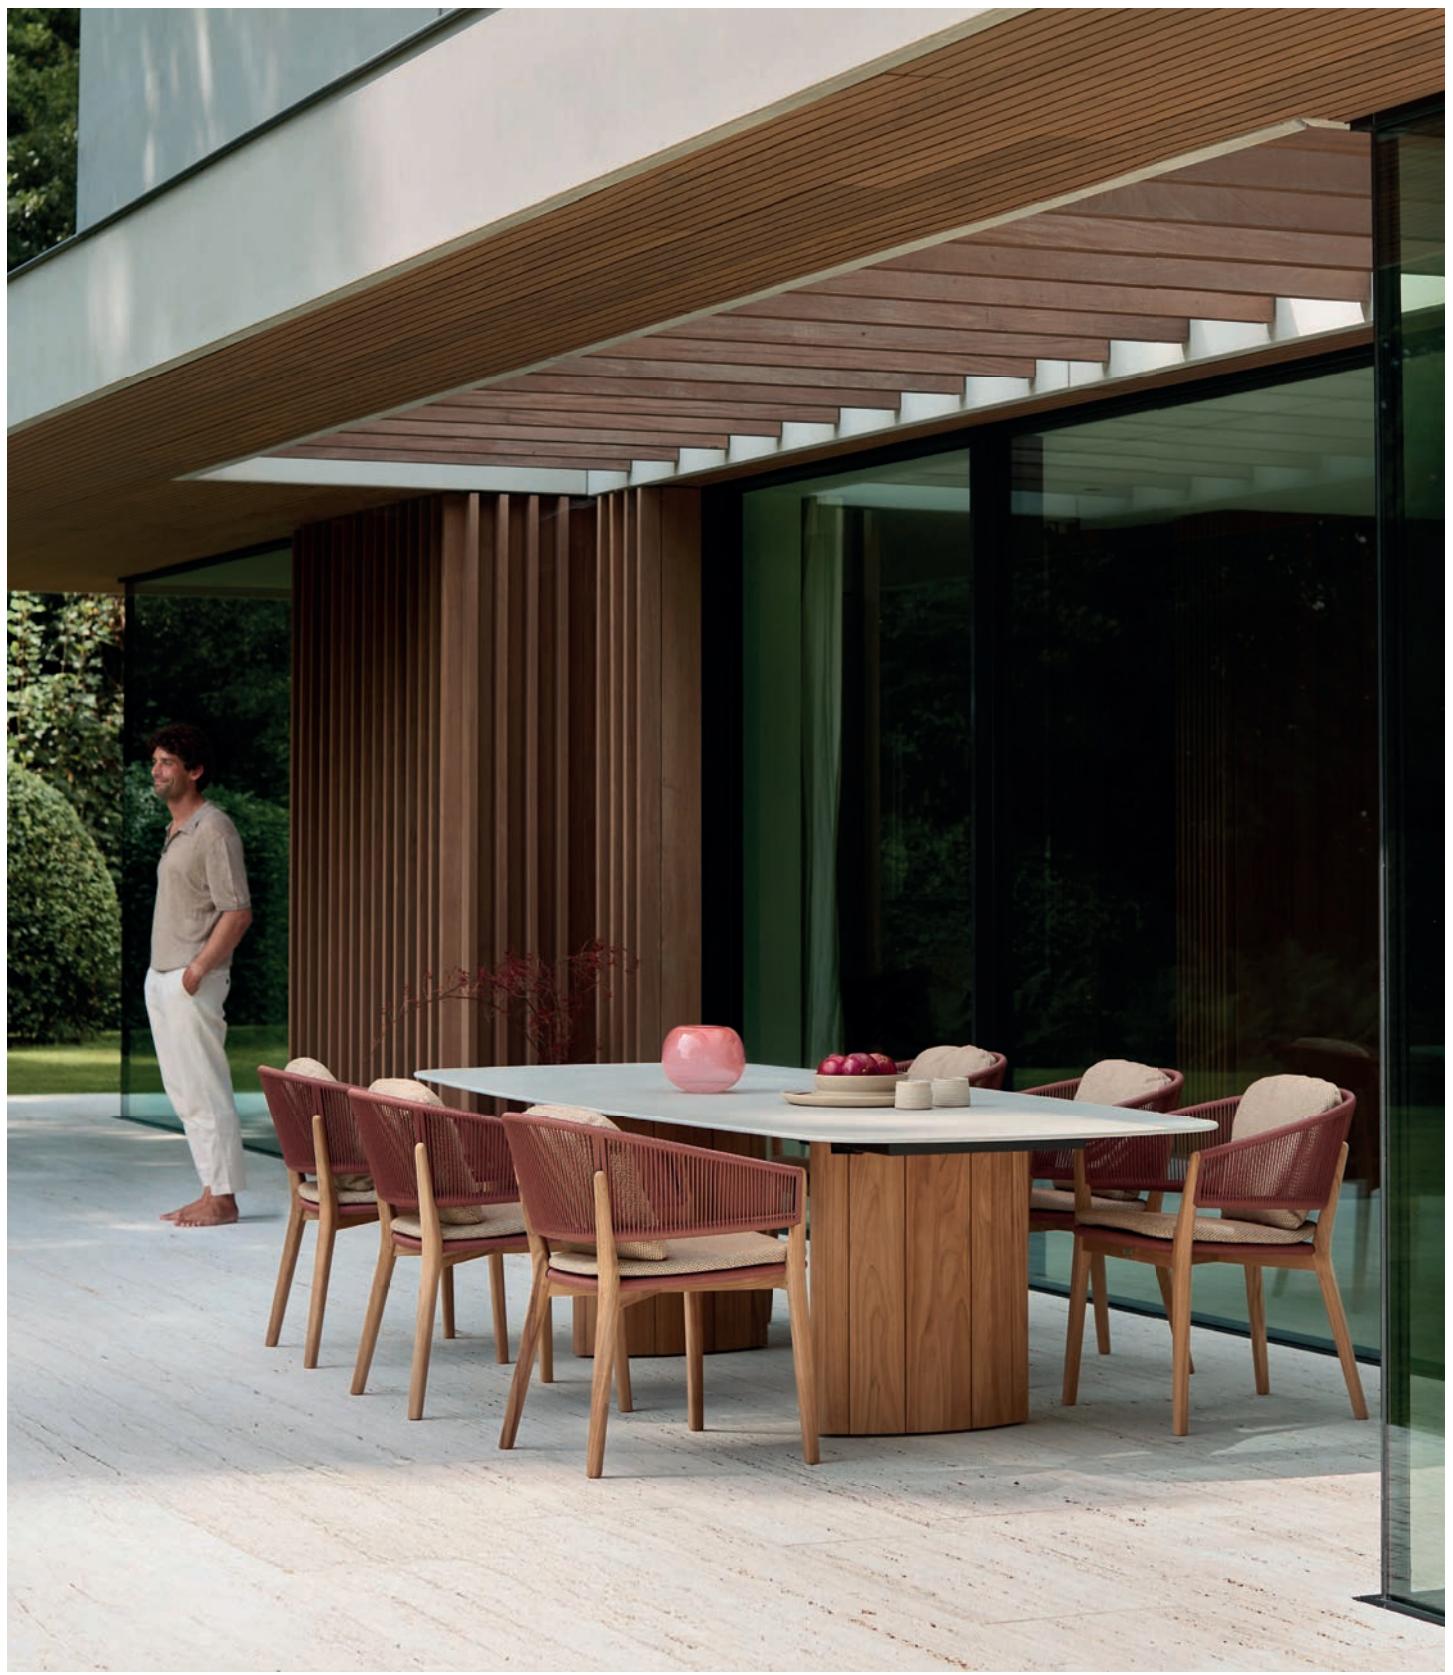

Designed by Kris Van Puyvelde, the Carés Collection captures the art of simplicity through refined lines and tactile contrasts. Its gently curved frame, available in natural teak or powder-coated aluminium, gives each piece a calm and balanced presence in any outdoor setting.

The hand-woven backrest adds depth and texture, available in Sage Green, Anthracite, brick or Pebble, subtle tones that harmonise beautifully with the frame's materiality. Alongside the dining and lounge models, the collection also includes a low lounge chair that extends the same elegant comfort to more relaxed settings.

# Carés

The ropes are hand-woven around a coated stainless-steel subframe that offers strength and stability while supporting the teak structure. Each fibre has a stretch-resistant polyester core and a UV-proof outer layer that repels water, helping the seat dry fast and stay refined.

Through its thoughtful mix of materials and craftsmanship, Carés carries a quiet sense of confidence. The design balances durability with tactile softness, remaining effortlessly timeless while maintaining its character with minimal care, season after season.

*Every Carés chair reveals its quality in the details. The solid teak frame is shaped with gentle curves and precise junctions, creating a smooth continuity between the seat and the flowing backrest. The hand-woven back adds warmth and texture, giving the design its distinctive depth and tactility.*

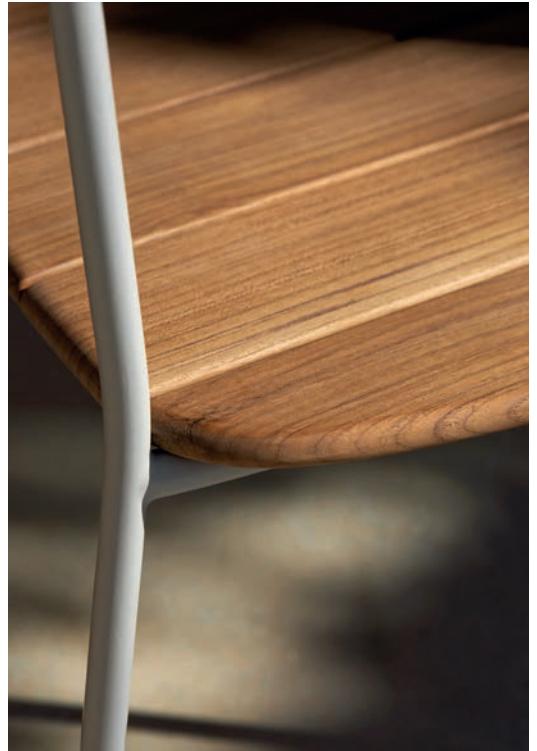

# Cordiz

The Cordiz Chair was born from a desire to create lightness in both form and function. We set out to design a chair that would feel effortless to move, comfortable to use, and strong enough to endure the elements.

That search led to a structure defined by precision and poise. A sleek stainless steel frame supports a solid teak seat, creating a refined contrast between warm natural wood and slender geometry. The use of stainless steel allows for an exceptionally thin silhouette that remains durable, stable, and stackable, combining practicality with elegance.

At the back, tensioned cords trace soft, geometric lines that bring both support and rhythm. The cords share the same advanced composition as those in the Carés Collection, featuring a stretch-resistant polyester core wrapped in a coloured, UV-proof layer that repels water and dries quickly. Combined with the teak seat slats and woven armrests, this interplay of materials brings warmth and tactility to its architectural form.

*Designed for everyday ease, Cordiz feels open, dynamic, and effortlessly at home in any setting.*

# Exes

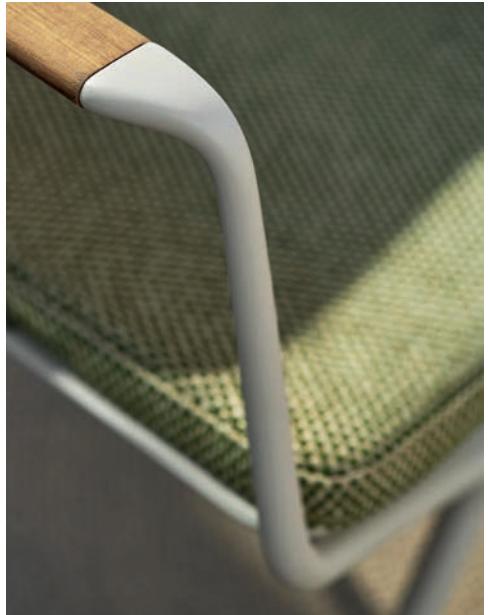

A director's chair, reinterpreted with sculptural precision. Designed by Kris Van Puyvelde, the Exes Collection features bold X-shaped frames in cast aluminium. A striking geometry that conveys both strength and lightness.

Tapered teak armrests bring a natural warmth to the silhouette, balancing metal and wood in quiet harmony. The optional teak backrest and seat continue this dialogue of materials, while the distinctive X-shaped openings serve as discreet attachment points for cushions.

Defined by clarity of line and understated comfort, Exes offers a contemporary take on a classic form: refined, balanced, and built to endure. The collection is also available in a lower version, ideal for relaxed low dining settings.

# Folia

Derived from the Latin *folium*, meaning leaf, the Folia Collection takes its inspiration from the natural world and its effortless geometry. Just as a leaf balances strength and delicacy through its veins and curves, Folia translates this organic logic into a sculptural, architectural form.

The flowing lines of the stainless steel frame evoke movement and continuity, creating a design that feels both airy and precise. Its open pattern interacts beautifully with its surroundings, allowing light and shadow to play across the surface in ever-changing ways.

Available in a selection of subtle hues, each finish complements natural materials and outdoor settings with understated elegance. Whether paired with teak or ceramic tables, or standing alone as a statement piece, Folia captures the harmony between nature and design in its purest form.

*The collection extends beyond the dining chair to include a low dining chair and a rocking chair, designed for relaxed moments with family and friends. Whether enjoying a quiet morning coffee or lingering outdoors as the day slows down, these pieces create a setting where comfort and ease take over.*

Discover the versatility of the Jive Collection, where chairs seamlessly blend into both modern and classic settings. Available in three unique material combinations, the Jive chair can be customized with either a teak or aluminum backrest, and the seat is offered in weaving, aluminum, or Batyline options. For added comfort, you can choose to add cushions, or opt for the sleek, cushion-free Batyline version, ensuring a perfect fit for your style and needs. Whether you're looking for functionality, elegance, or a mix of both, the Jive Collection adapts effortlessly to any space.

# Jive

*The Jive Chair exudes timeless elegance and effortless charm. Crafted with the meticulous attention to detail that defines Royal Botania, it combines refined proportions with enduring comfort. Its graceful silhouette brings harmony to any outdoor setting, from a sunlit terrace to the calm of a secluded garden. Built to withstand the elements while radiating sophistication, the Jive Chair is a celebration of craftsmanship, comfort and lasting beauty.*

# Mambo

Designed by Kris Van Puyvelde, the Mambo Chair and Mambo Low Chair offer a perfect balance of comfort and style. With their rounded teak frames and plush cushions, they bring a welcoming elegance to any outdoor setting. The Mambo Chair is ideal for dining, while the Mambo Low Chair offers a more relaxed, lounge-like experience. Both can be customized with luxurious fabrics, ensuring they perfectly match your personal aesthetic.

Unlike the Mambo Lounge, which features an internal stainless steel structure for added support, the Mambo Chair and Mambo Low Chair rely entirely on the natural strength and refinement of solid teak. Their gracefully curved armrests, slender legs, and inviting cushions create a look of effortless lightness and timeless sophistication.

For over two decades, the Ninix Chair embodies refined minimalism and enduring craftsmanship. Its sleek lines and balanced proportions express timeless elegance, while premium materials ensure lasting performance in any environment.

Crafted with precision, the chair features a stainless steel frame with optional teak armrests, seamlessly paired with Batyline for optimal comfort and durability.

A lasting icon of modern outdoor design, the Ninix Chair brings understated luxury and everyday ease to any setting, season after season.

# Ninix

# Ostrea

The Ostrea Chair embodies the refined simplicity of the sea. Named after the Latin word for “oyster”, it reflects designer Mathias De Ferm’s creative vision through fluid contours and meticulous craftsmanship. Each stainless steel tube is precisely rolled, bent, and welded, revealing the sculptural quality of true craftsmanship.

The collection offers two cushion styles: a rounded seat that leaves the curved back elegantly exposed, or full padding that follows the organic shape of the oyster.

The O-Zon Chair embodies sculptural elegance shaped for everyday life. Its slender frame, crafted from stainless steel or coated aluminium, expresses both strength and refinement. Designed to be stackable, it moves effortlessly between settings, from an intimate terrace to a lively dining area, while maintaining its crisp, contemporary character.

# O-zon

# Strappy

In designing the Strappy Collection, Kris Van Puyvelde reimagined outdoor seating with sleek lines and precision of detail. The collection's signature straps, elegantly wrapped around the frame, create a distinctive aesthetic while ensuring resilience and comfort, no matter the weather.

Crafted from premium materials, the Strappy Collection balances lightweight elegance with lasting durability. The sleeves, available in a range of refined finishes, offers the flexibility to customize each piece to perfectly complement your outdoor space. Whether grouped around a dining table or used as standalone seating, the Strappy Collection integrates seamlessly into any setting.

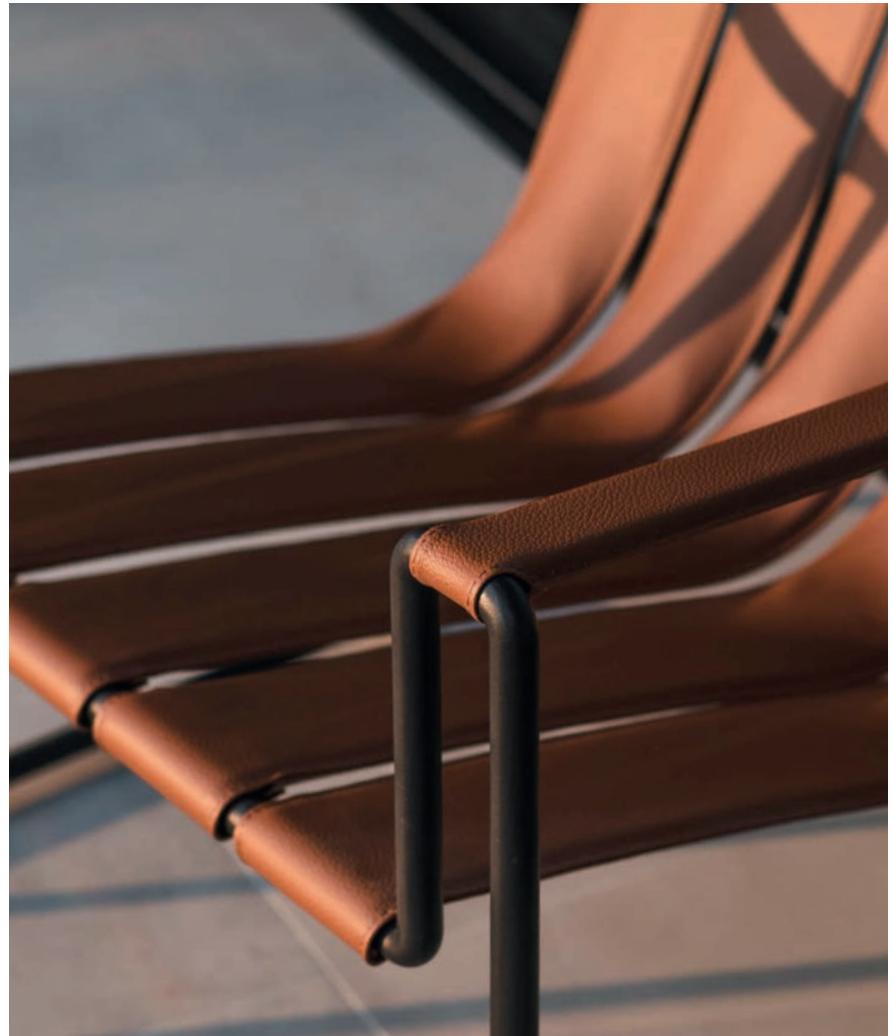

*Extending the concept, the Strappy Lounge Chair and Strappy Rocking Chair offer a lower, more relaxed seating position, translating the collection's signature design language into a piece made for unwinding.*

# Styletto

As its name suggests, the Styletto Chair stands with the same poise and elegance as a fine stiletto heel. Its slender, tapered legs give the design a graceful silhouette, while the precise geometry brings balance and composure to any setting.

Built on a lightweight aluminium frame, it combines strength with versatility through a modular seat system, quick-drying cushions and a practical snap-on backrest. The result is a design that feels effortlessly light, inviting, and enduring. A chair made for refined outdoor living.

Crafted from the finest teak, the Zenhit carver and Low Chair embody both durability and timeless elegance. Their modest yet sophisticated design complements any outdoor setting, offering a refined balance of comfort and style.

With clean lines and exceptional craftsmanship, these chairs provide a seamless addition to your outdoor space, making them ideal for both dining and lounging. An additional aluminum plate discreetly integrated into the back cushion enhances comfort and support, ensuring an even more enjoyable seating experience.

# Tables

# Butler

The Butler Collection is defined by its refined simplicity and versatility. Each table rests on a slender coated stainless steel base with a central column design that fits seamlessly into any terrace setting, from compact side tables to spacious dining tables.

A wide choice of tabletops, available in ceramic, enamelled lava stone, cast glass or teak, allows for harmony in both tone and texture.

At the heart of the collection, the Butler dining table combines elegance with practicality. Its central base maximizes legroom and comfort, offering a perfectly balanced design that brings quiet coherence to any outdoor space.

# Conix

The Conix Table Collection reveals a clear architectural language through its sculptural, conical bases cast in fibre-reinforced Ductal® concrete. These solid forms are available in two tones: a warm desert beige that softens the space, and a cool industrial grey that adds a contemporary edge.

A range of tabletop shapes, including the signature squircle, introduces subtle movement and visual rhythm. Offered in multiple heights, the Conix tables adapt effortlessly to different settings, from intimate lounge arrangements to generous dining compositions.

Defined by durable materials and refined geometry, the collection brings structure and serenity to both outdoor and indoor environments.

The Conix Side Table captures the collection's sculptural spirit in a compact form. Tabletops are available in lava stone, ceramic, concrete or teak, each material adding its own texture and tone.

# Exes

Complementing the Exes chairs, the tables in the collection feature the same distinctive X-shaped leg design. A sculptural tripod for the round models and a four-legged frame for the oval versions. Each piece reflects the collection's architectural coherence, translating the graphic interplay of lines into a solid yet refined structure.

Available in a curated selection of ceramic finishes and teak tops, the Exes tables integrate effortlessly into contemporary environments. Whether placed indoors or outdoors, they bring a sense of balance and precision that defines the Exes Collection's modern character.

# Furniz

At its core lies a central column that not only supports the table but also neatly houses the electric cable, ensuring a clean and refined appearance. In warmer months, this column can easily be replaced with a complementary version without wiring, allowing the table to adapt seamlessly to every season.

Conceived as furniture that can serve as a furnace, the Furniz Table merges comfort, innovation, and design excellence to redefine the concept of outdoor living.

reddot winner 2025

*The Furniz table combines elegant design with discreet functionality. The single base model integrates a 2000 W infrared heating element, while the dual base versions feature two 1600 W elements, providing instant warmth at the touch of a hidden switch beneath the tabletop.*

*In warmer months, the cable column can easily be replaced with a complementary version without wiring, allowing the table to adapt seamlessly to every season. Its intelligent design and refined detailing were recognised with a Red Dot Design Award.*

*By lowering the table height, Furniz softens the boundary between lounging and dining, creating a setting where time stretches and conversation flows.*

*It encourages an unhurried rhythm, dinners that flow into late evenings, moments that feel spontaneous yet composed. Low dining transforms outdoor living into a more intimate and grounded experience, where comfort defines the pace.*

# Ninix

The Ninix tables feature a sleek, minimalist design with a frame crafted from brushed or coated stainless steel. The tabletops are available in either teak or ceramic, allowing you to choose the look that suits your space. For added versatility, the Ninix range includes an extendable version, perfect for accommodating larger gatherings while maintaining its modern, streamlined aesthetic.

# Styletto

With its slender, tapered legs and sculptural balance, the Styletto Table brings architectural elegance to outdoor living. Available with either aluminium or solid teak legs, it offers a choice between a sleek contemporary look and a warmer, more natural expression. The design combines visual lightness with remarkable strength, creating a table that feels both refined and enduring.

Offered in a wide range of heights, shapes and finishes, the Styletto Table adapts naturally from intimate lounge settings to generous dining arrangements. Every detail reflects precision and craftsmanship, from the seamless junctions to the rich combination of materials. The result is a piece that complements any outdoor environment with timeless elegance.

The new super ellipse tabletop introduces a gentle evolution in form. Its softened geometry bridges the precision of a rectangle and the fluidity of an oval, resulting in a shape that feels balanced and natural from every angle.

Designed to complement any Royal Botania table base, the super ellipse creates visual harmony across all collections. In sienna arena ceramic, the surface highlights the subtle contour of the edge, revealing both craftsmanship and material depth.

# Regaliz

Designed by Kris Van Puyvelde and honoured with a Red Dot Design Award for Product Design, the Regaliz Table stands as the epitome of outdoor luxury. Its sculptural oval teak bases support a range of tabletops in glass, ceramic, or enamelled lava stone. The glass version, crafted with a special melting technique, comes in distinctive finishes such as dark green, dark brown, and pebble, while the lava stone is available in a refined palette of colours that highlight the material's natural depth and texture.

Available in sizes ranging from 310 to 490 cm, the table's modular design features trapezium-shaped sections that combine grandeur with flexibility. While conceived for outdoor living, the Regaliz Table's sophisticated presence and material richness make it equally at home in an elegant indoor setting.

With its exceptional design and innovative craftsmanship, the Regaliz Table embodies refined strength and effortless elegance, becoming the natural centrepiece of any distinguished environment.

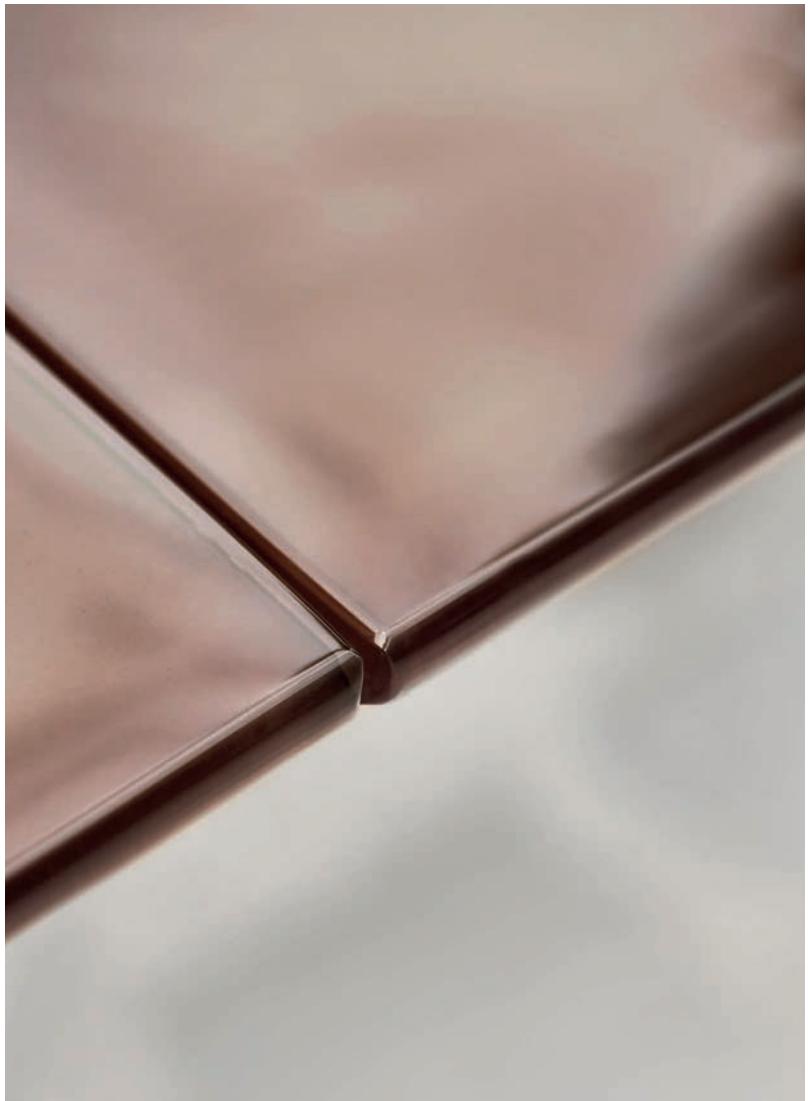

reddot winner 2025

Once cut and shaped to perfection, the glass is placed on a textured mould and gently reheated to its melting point. During this stage, the underside takes on the relief of the surface beneath, while the top develops its signature organic waves.

After cooling, the glass is coated in deep forest green, rich brown or soft pebble tones, then tempered and carefully polished. The result is a surface of remarkable depth and character, a true visual delight.

Carefully selected slabs of lava stone, sourced from volcanic eruptions around Mount Vesuvius and Sicily, are coated with a fine layer of enamel and fired at 950°C. During this intense process, each piece develops its own unique surface texture and tonal variation. No two slabs emerge exactly alike, and when combined into a single tabletop, their subtle differences create a rich, natural composition. The result is a surface of exceptional depth and beauty.

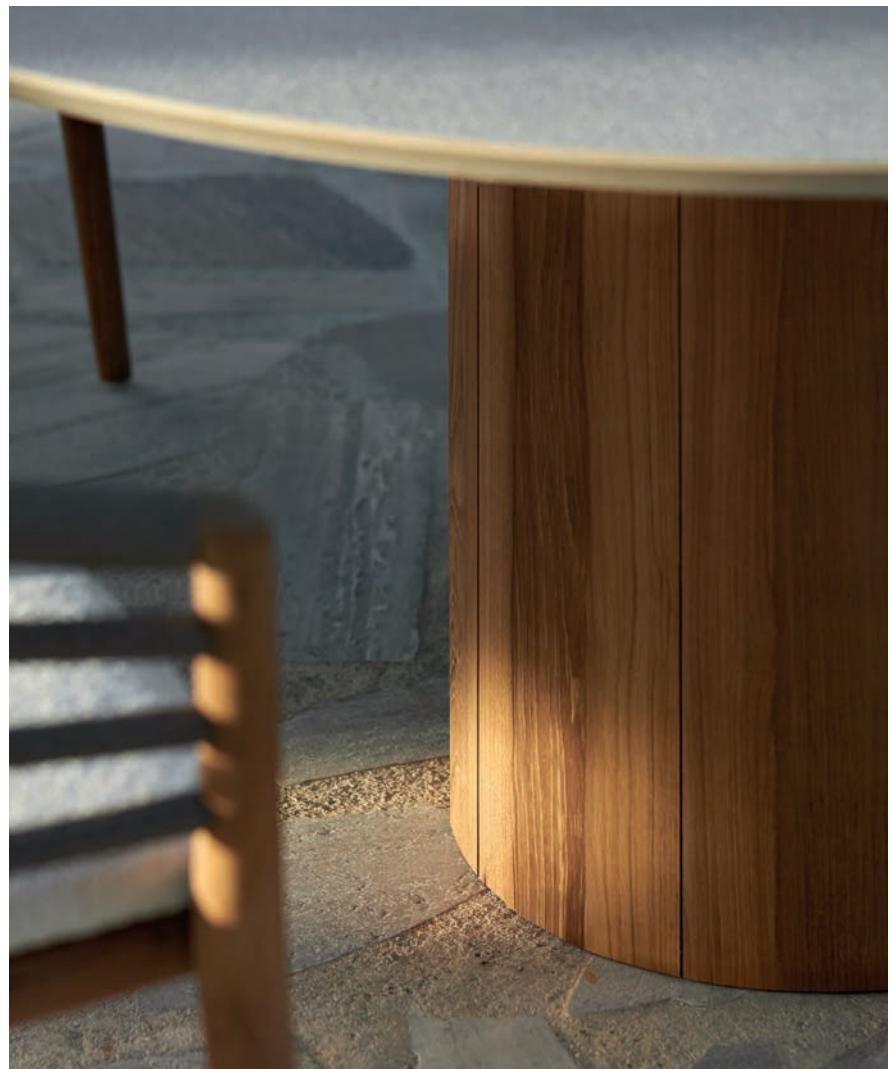

*Following the instant success of our award-winning sectional Regaliz table, a new round version has been introduced, crafted entirely from solid teak. This design brings a softer, more organic expression to the collection, highlighting the warmth and natural beauty of the wood. Its round form invites connection and conversation, becoming an elegant focal point for relaxed outdoor dining.*

# U-nite

The U-Nite collection is defined by its architectural clarity and inviting materiality. Each table features a teak or powder-coated aluminium frame paired with a floating tabletop in ceramic or teak. The ceramic versions fit precisely within the frame thanks to their angled edge, creating a sleek and cohesive surface.

Available in multiple sizes and shapes, the U-Nite collection brings a sense of order and refinement to contemporary outdoor dining environments.
